# Manuscript submission for CYTOTECHNOLOGY INCORPORATING METHODS IN CELL SCIENCE

## Online Manuscript Submission

Springer now offers authors, editors and reviewers of *Cytotechnology incorporating Methods in Cell Science* the option of using our fully web-enabled online manuscript submission and review system. To keep the review time as short as possible (no postal delays!), we encourage authors to submit manuscripts online to the journal's editorial office. Our online manuscript submission and review system offers authors the option to track the progress of the review process of manuscripts in real time. Manuscripts should be submitted to: <http://cyto.edmgr.com>

The online manuscript submission and review system for *Cytotechnology incorporating Methods in Cell Science* offers easy and straightforward log-in and submission procedures. This system supports a wide range of submission file formats: for manuscripts - Word, WordPerfect, RTF, TXT and LaTeX; for figures - TIFF, GIF, JPEG, EPS, PPT, and Postscript.

**NOTE:** By using the online manuscript submission and review system, it is NOT necessary to submit the manuscript also in printout + disk. In case you encounter any difficulties while submitting your manuscript online, please get in touch with the responsible Editorial Assistant by clicking on "CONTACT US" from the tool bar.

### ***Electronic figures***

Electronic versions of your figures must be supplied. For vector graphics, EPS is the preferred format. For bitmapped graphics, TIFF is the preferred format. The following resolutions are optimal: line figures - 600 - 1200 dpi; photographs - 300 dpi; screen dumps - leave as is. Colour figures can be submitted in the RGB colour system. Font-related problems can be avoided by using standard fonts such as Times Roman, Courier and Helvetica.

### ***Colour figures***

Colour figures may be printed at the author's expense. Please indicate at submission which figures should be printed in colour, the number of colour pages you prefer and to which address we can send the invoice. In addition, please specify if figures are to appear together on a colour page.

### ***Language***

We appreciate any efforts that you make to ensure that the language is corrected before submission. This will greatly improve the legibility of your paper if English is not your first language.

## **Manuscript Presentation**

The journal's language is English. British English or American English spelling and terminology may be used, but either one should be followed consistently throughout the article. *Cytotechnology incorporating Methods in Cell Science* welcomes general papers, review papers and short communications. General papers describing original research should not exceed ten pages of text (including references, tables and figures). Review papers should not exceed 25 pages of text (including references, tables and figures). Please double-space all material, including notes and references. Quotations of more than 40 words should be set off clearly, either by indenting the left-hand margin or by using a smaller typeface. Use double quotation marks for direct quotations and single quotation marks for quotations within quotations and for words or phrases used in a special sense.

Number the pages consecutively with on the first page:

running head (shortened title)  
article type  
title  
subtitle  
author(s)  
affiliation(s)  
full address for correspondence, including telephone and fax number  
and e-mail address

## **Abstract**

Please provide a short abstract of 100 to 250 words. The abstract should not contain any undefined abbreviations or unspecified references.

## **Key Words**

Please provide 5 to 10 key words or short phrases in alphabetical order.

## **Abbreviations**

Abbreviations and their explanations should be collected in a list. List only those which are not familiar and/or commonly used.

## **Abbreviations and units**

SI units should be used, e.g.: mg, g, kg, km, m, cm, mm, ppm, cpm, l (litre), ml, s (second), min (minute), h (hour), mol, m<sup>-3</sup>, kg per ha or kg ha<sup>-1</sup> (the minus index form is always to be used in tables).

Use mg l<sup>-1</sup>, not mg/l.

If a non-standard abbreviation is to be used extensively, it should be defined under the heading 'Abbreviations'.

## Section Headings

First-, second-, third-, and fourth-order headings should be clearly distinguishable but not numbered.

## Appendices

Supplementary material should be collected in an Appendix and placed before the Notes and Reference sections.

## Notes

Please use endnotes rather than footnotes. Notes should be indicated by consecutive superscript numbers in the text and listed at the end of the article before the References. A source reference note should be indicated by means of an asterisk after the title. This note should be placed at the bottom of the first page.

## Cross-Referencing

In the text, a reference identified by means of an author's name should be followed by the date of the reference in parentheses and page number(s) where appropriate. When there are more than two authors, only the first author's name should be mentioned, followed by 'et al.'. In the event that an author cited has had two or more works published during the same year, the reference, both in the text and in the reference list, should be identified by a lower case letter like 'a' and 'b' after the date to distinguish the works.

### *Examples:*

Winograd (1986, p. 204)  
(Winograd 1986a, b)  
(Winograd 1986; Flores et al. 1988)  
(Bullen and Bennett 1990)

## Acknowledgements

Acknowledgements of people, grants, funds, etc. should be placed in a separate section before the References.

## Figures

All photographs, graphs and diagrams should be referred to as a 'Figure' and they should be numbered consecutively (1, 2, etc.). Multi-part figures ought to be labelled with lower case letters (a, b, etc.). Please insert keys and scale bars directly in the figures. Relatively small text and great variation in text sizes within figures should be avoided as figures are often reduced in size. Figures may be sized to fit approximately within the column(s) of the journal. Provide a detailed legend (without abbreviations) to each figure, refer to the figure in the text and note its approximate location in the margin. Please place the legends in the manuscript after the references.

## Tables

Each table should be numbered consecutively (1, 2, etc.). In tables, footnotes are preferable to long explanatory material in either the heading or body of the table. Such explanatory footnotes, identified by superscript letters, should be placed immediately below the table. Please provide a caption (without abbreviations) to each table, refer to the table in the text and note its approximate location in the margin. Finally, please place the tables after the figure legends in the manuscript.

---

## Methods in Cell Science submissions:

**While, in general, all Manuscript Submission information given above also applies to the Methods in Cell Science section, the following points should be considered in addition (except for reviews):**

**Materials:** List **all** items (i.e., chemicals and special tools) necessary to carry out the method, providing both a supplier and a catalogue number (when applicable) for each item. If this list is extensive, subdivide into categories

such as equipment, chemicals, etc. For each item, place a superscript number after the supplier and list all the suppliers in numerical order with their full addresses at the end of the Methods section as “Notes on Suppliers”. Describe preparation and use of all chemical solutions, media and special reagents.

**Methods:** Describe the procedures in full detail, as if the reader would be working alongside the researcher. Include any health and safety precautionary notes, if applicable. The reader must be able to reproduce the experiments exactly with the information given in the manuscript. In writing, use present tense imperative mode.

**Results and Discussions:** It is absolute required that the authors document and discuss the reproducibility of their method and its (potential) application(s) based in the data shown. A statistical analysis of the reproducibility of the method(s) must also be given. Discussion should indicate (possible) applications of the method(s) including a description of its problems and limitations.

---

## **Proofs**

Proofs will be sent to the corresponding author by e-mail (if no e-mail address is available or appears to be out of order, proofs will be sent by regular mail).

Your response, with or without corrections, should be sent within 72 hours. Please do not make any corrections to the PDF file.

Minor corrections (10) should be sent as an e-mail attachment to: [proofscorrection@springer.com](mailto:proofscorrection@springer.com). Always quote the four-letter journal code and article number and the DO No. from your proof in the subject field of your e-mail.

Extensive corrections must be clearly marked on a printout of the PDF file and should be sent by first-class mail (airmail overseas).

## **Offprints**

Fifty offprints of each article will be provided free of charge. Additional offprints (both hard copies and PDF files) can be ordered by means of an offprint order form supplied with the proofs.

## **Page Charges and Colour Figures**

No page charges are levied on authors or their institutions except for colour pages. Up to two (2) colour pages (irrespective of the number of individual figures on them) will be published free of charge if the Editor and Referees consider this essential. Additional colour pages will be charged accordingly.

## **Copyright**

Authors will be asked, upon acceptance of an article, to transfer copyright of the article to the Publisher. This will ensure the widest possible dissemination of information under copyright laws.

## **Permissions**

It is the responsibility of the author to obtain written permission for a quotation from unpublished material, or for all quotations in excess of 250 words in one extract or 500 words in total from any work still in copyright, and for the reprinting of figures, tables or poems from unpublished or copyrighted material.

## **Springer Open Choice**

In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer now provides an alternative publishing option: Springer Open Choice. A Springer Open Choice article receives all the benefits of a regular subscription-based article, but in addition is made available publicly through Springers online platform SpringerLink. To publish via Springer Open Choice, upon acceptance please visit [www.springer.com/openchoice](http://www.springer.com/openchoice) to complete the relevant order form and provide the required payment information. Payment must be received in full before publication or articles will publish as regular subscription-model articles. We regret that Springer Open Choice cannot be ordered for published articles.
